"Developing learners for life"

Waikite Valley School Digital Citizenship Policy

Rationale

Waikite Valley School supports a Digital Citizenship model for the promotion of safe and responsible use of technology.

The board recognises that by fostering a culture of successful digital citizenship in our students, staff and our wider community we are encouraging everyone to take responsibility for themselves and others in their use of ICT (Information & Communication Technology). This allows us to harness the potential that technology brings to the teaching and learning process, while minimising and learning to effectively respond to the challenges we may experience while using them in a learning context.

The board is aware that preparing our students to make effective use of ICT is an important part of their preparation for participation and contribution in society today and into the future.

It is our belief that we must prepare our students to actively participate in the world in which they live. It is clear that a key skill in this new world will be their ability to participate as effective digital citizens. An important part of learning these skills is being given the chance to experience the opportunities, and the challenges presented by technology in a safe, secure and nurturing environment, where clear, effective guidance can be sought as students and teachers learn.

The board recognises that its obligations under the National Administration Guidelines extend to use of the internet and related technologies.

Policy

Waikite Valley School will develop and maintain procedures around the safe and responsible use of the internet and related technologies (ICT). These internet safety procedures will recognise the value of the technology and encourage its use in a teaching and learning context while helping to minimise and manage the challenges that may be experienced by students, teachers and the wider school community.

The school will consult with parents and the wider school community, as to how it intends to use ICT and where possible explain how it benefits the teaching and learning process.

These procedures will aim to not only maintain a safer school environment, but also aim to address the need of students and other members of the school community to receive education about the safe and responsible use of information and communication technologies.

Date policy adopted by the Board:.....17th August 2016.....

Chairperson: ...Shelley Muller.....

Netsafe Tips for Parents

The following tips are designed to enhance your digital parenting knowledge and have been developed with parents in mind.

- 1.Understand:** Read about the potential online risks, challenges and sometimes illegal behaviour young people face to understand what may happen
- 2.Learn:** Ask your child about what they do, how they use devices and who they talk to learn about their activities. Check in regularly to see what has changed
- 3.Explore:** Take the time yourself to explore the sites, apps and technologies your child uses to improve your knowledge and understand their experience
- 4.Agree:** Create a family code with your child to agree on what they can do online including sites to visit, appropriate behaviours, privacy settings and limits
- 5.Start:** Recognise each child has unique needs, but some online safety concepts are universal.
- 6.Model:** Be a good example to your child. Make sure you role model the sort of behaviours you want to see your child use online and offline
- 7.Plan:** Make a plan so everybody knows what to do if something goes wrong and where you will be able to get advice and support in challenging times.

Visit: www.netsafe.org.nz for more information regarding cyber-safety and digital citizenship.

Around our School

Pod 2 - The kids created, presented and sold amazing products. Pai te Mahi!
